Mission and Focus

The mission of the Virginia Environmental Endowment (VEE) is to improve the quality of the environment by using its capital, expertise and resources to encourage all sectors to work together to prevent pollution, conserve natural resources, and promote environmental literacy.

The Endowment’s strategic planning priorities include the improvement of local rivers and the protection of water quality, the restoration of the Chesapeake Bay, innovative land conservation and sustainable land use practices, and environmental literacy and public awareness. Emerging issues of concern presently include coastal climate adaptation, efforts to mitigate environmental impacts due to hydraulic fracturing, and water supply planning and implementation.

Although accorded a national scope by its charter, the Endowment currently limits awards to eligible organizations or institutions or governmental agencies for programs conducted in the state of Virginia and in the Kanawha and Ohio River Valleys of Kentucky and West Virginia.

History

The Virginia Environmental Endowment, a nonprofit, independent grant-making foundation, came about in a unique way: by court order. In February 1977, in the United States District Court for the Eastern District of Virginia, Allied Chemical Corporation was fined $13.2 million for polluting the James River with the insecticide Kepone. With the approval of Judge Robert R. Merhige Jr., a portion of this fine ($8 million) was paid by Allied to fund the creation of the Virginia Environmental Endowment for the purpose of improving the quality of Virginia’s environment.

Between 1981 and 1991, VEE received another $1.4 million in court settlements paid by the FMC Corporation, Bethlehem Steel Corporation, Wheeling-Pittsburgh Steel Corporation, IR International, Inc., and Hauni Richmond, Inc. The FMC funds expanded the Endowment’s work in Virginia and beyond into the Kanawha River and Ohio River Valleys.

The Endowment has worked collaboratively for more than three decades as a leader and convener, improving environmental quality, advancing environmental literacy, and partnering to establish land trusts, conservation networks, and a statewide mediation center.

Financial Summary

The March 31, 2016 reviewed asset value of the Virginia Environmental Endowment was $17,714,106. During the fiscal year the Board of Directors approved 28 grants totaling $525,615. When combined with matching funds, grants awarded by VEE since 1977 to a wide variety of organizations represent an investment of over $78 million in environmental improvement.

Grant Programs

VEE awards grants through two programs:
- Virginia Program
- Kanawha and Ohio River Valleys Program

Virginia Program

The Virginia Program provides support for innovative environmental programs featuring tangible outcomes, as well as applied research, collective impact, collaboration and education. Strategic priorities adopted by the Endowment’s Board of Directors in 2013 include:
- Improvement of local rivers and protection of water quality;
- Restoration of the Chesapeake Bay;
- Innovative land conservation and sustainable land use practices;
- Environmental literacy and public awareness;
- Emerging issues of concern including coastal climate adaptation, efforts to mitigate environmental impacts due to hydraulic fracturing, and water supply planning and implementation.

Kanawha and Ohio River Valleys Program

Limited to the Kanawha and Ohio River Valleys of Kentucky and West Virginia, this grant program supports research, education, and community action on water quality and the effects of water pollution on public health and the environment. Preference is given to collaborative efforts by nonprofit organizations, government, and industry to develop public policies and to increase public participation in water quality protection and monitoring, watershed management, and civic engagement.
PROCEDURES

GRANT CRITERIA

• The Endowment makes grants to nonprofit, tax-exempt, charitable organizations and institutions and to governmental agencies.

• VEE encourages requests for specific projects that promise measurable results to improve the environment. Applicants should describe specifically how they propose to measure the success of a grant project.

• Grant funds are not provided for general support, overhead, indirect costs, capital projects, land purchases, building construction or renovation, endowments, lawsuits, or to individuals.

• Projects are required to have matching funds in amounts equal to or in excess of the grant request. Challenge grants may be offered to provide leverage in fundraising.

• Proposals must be complete and submitted by the deadline.

• Grants must align with the mission and priorities of the Virginia Environmental Endowment.

• Proposals that are clearly outside the purposes and geographic limitations of our grant-making programs may be declined without further review.

• Grantees are required to submit periodic reports of progress, expenditures, and results. Approved grants are paid in installments on a reimbursement basis.

• VEE does not reimburse project costs that are incurred before the authorization date of any grant that might be awarded. Grants are typically awarded in October and April.

• Each year the Endowment receives requests far in excess of available funds. In fairness to others, applicants are asked not to apply to the Endowment more than once a year.

REQUIRED DOCUMENTATION

• A cover letter identifying the applicant, project title, grant request, matching funds, project schedule, and whether the proposal is being submitted to the Virginia Program or the Kanawha and Ohio River Valleys Program.

• A project description, limited to five pages, clearly stating the need for the project, goals and objectives and how they will be achieved, how project results will be measured, and relationship to other work being done in the field. It is suggested that the description include aspects of Collective Impact or collaboration, when applicable.

• A description of the organization, names and qualifications of key project staff, a list of the members of the governing board, the current operating budget, and a copy of the current tax-exempt ruling from the Internal Revenue Service, if applicable.

• A line-item budget for the proposed project, showing total project costs, the amount and proposed allocation of grant funds requested from the Endowment, and all sources and amounts of matching funds, which must be equal to or exceed the requested grant.

• The project schedule, with specific beginning and ending dates for requested grant support. Board decisions about proposals are normally made in April and October.

• A detailed plan for evaluating and disseminating project results, for continuing project activities, and for raising future financial support, if applicable.

Two copies of the complete proposal signed by the organization’s chief executive officer or board chair must be received by the program deadline date. If possible, please email the proposal to VEE as well: send to info@vee.org.

The Endowment does not review or comment on preliminary proposals.

DEADLINES AND MAILING ADDRESSES

Proposals must be received by the Endowment by 5 p.m. (ET) on the following dates:

• Virginia Program: June 15 and December 1

• Kanawha and Ohio River Valleys Program: June 15

When the date falls on a weekend or holiday, the following business day will be the deadline.
